(I apologize in advance if readers feel that their newsgroup was not

appropriate for this post. I picked the closest three I could find; feel free to email me if you think I should add or delete a newsgroup name from the newsgroup's line. (one companies name showed up in GPS world (hence sci.geo.satellite-nav)).

I would like to know the names and addresses (or phone numbers) of all companies that are planning low earth orbit communications systems. The following incomplete list has the ones I am familiar with so far, if anyone knows of any others please email me and I'll post an update later. Thank you.

Little LEO (data only)	Project Name
-----	-----
Orbital Communication Corp. Fairfax, Va.	ORBCOMM

Starsys Inc. Lanham, Maryland	Starnet
----------------------------------	---------

Big LEO (voice and data)	

Motorola Inc. Chandler, Arizona	Irridium

TRW Inc. (This system is more medium earth orbit) Redondo Beach, California	Odyssey
--	---------

Loral/Qualcomm	Globalstar
----------------	------------

dara parsavand who would be ecstatic to have a PET (Portable
parsavan@prony.colorado.edu Email Transciever), but is still waiting
